

# User Guide and Description

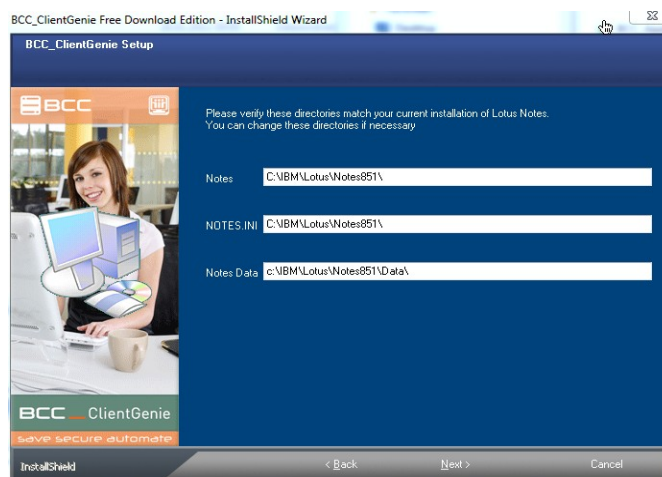

## BCC\_ClientGenie Free Workspace Edition

### 1. Introduction

The BCC\_ClientGenie Free Workspace Edition is a small excerpt of the BCC\_ClientGenie client management tool. It can be downloaded from <http://www.bcc.biz> and used for notes client desktop skinning. If you are interested in additional client management features offered by the BCC\_ClientGenie full version, see the description of the tool at <http://www.bcc.biz>.

### 2. Installation

Download the install package (BCC\_ClientGenie\_FDE\_10.exe) and user guide from [http://www.bcc.biz/hp/bcc\\_hp.nsf/id/DE\\_Free\\_Workspace\\_Edition](http://www.bcc.biz/hp/bcc_hp.nsf/id/DE_Free_Workspace_Edition). Start the installer and follow the instructions during installation. The installer determines your actual Lotus Notes environment and asks you to confirm this as shown in the following screenshot:

Choose “Next” if everything is fine. No further user actions are needed and after successful installation you will find the following changes within your lotus notes environment:

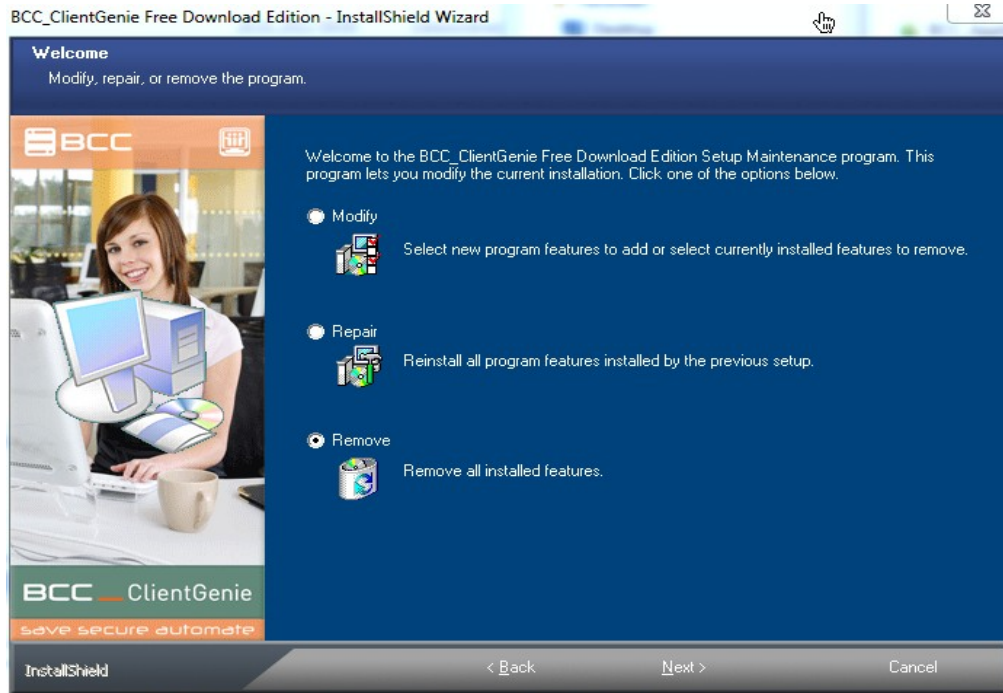

#### Result:

1. In your notes program directory, there should be two new files (clientgenie.dll and clientgenie.sym).
2. In your notes data directory, there should be a new directory, BCCThemes, that contains five sets (set\_1, ..., set\_5) of different desktop themes.
3. In your notes.ini file, there should be a new entry: “EXTMNGR\_ADDINS=clientgenie.dll”.

Please note that the textured workspace has to be activated in your Note Clients in order for the BCC\_ClientGenie Free Workspace Edition to perform the notes client desktop skinning. This can be activated under “Basic Notes Client Configuration” located under the File Preferences menu in your Notes Client.

### 3. Uninstall

Download the install package (BCC\_ClientGenie\_FDE\_10.exe) and user guide from [http://www.bcc.biz/hp/bcc\\_hp.nsf/id/DE\\_Free\\_Workspace\\_Edition](http://www.bcc.biz/hp/bcc_hp.nsf/id/DE_Free_Workspace_Edition) or use the version you have already downloaded for installation. Start Installer and choose "Remove" as shown below

After the uninstall, all directories and files should be removed from your lotus notes environment and there should be no entry related to clientgenie.dll in the notes.ini

## 4. Configuration

### 4.1 Default settings:

After installation, randomly at every client start one of the 5 sets within BCCThemes-directory is taken. You can remove or add additional BCCThemes sets. If you add sets, be sure that the added sets contain all needed files that are:

**02573.bmp** = Small icon at the upper right corner of the icon

**02574.bmp** = Background image

**02576.bmp** = Icon in state "not pressed" with some small sub-icon at the upper right corner

**02577.bmp** = Icon in state "pressed" with some small sub-icon at the upper right corner

**02578.bmp** = Empty Icon in state "not pressed"

**02579.bmp** = Empty Icon in state "pressed"

Your additional sets should be named similar to the example sets. For example, if you add a 6<sup>th</sup> set, the directory should be named "set\_6".

### 4.2 Set preferred skinning set:

If you want to use the same skinning set every time you start your notes client add the following entry in to the notes.ini:

```
BCC_ThemesSetNo=n,
```

where n is the number of the BCCThemes skinning set you want to use (i.e. BCC\_ThemesSetNo=4 if you always want to use set\_4 from BCCThemes-directory).

### 4.3 Add your own background picture:

At the moment this feature works but you have to perform the following steps:

1. Take the picture you want to use as background and convert it to the bitmap (.bmp) format.

Image-Resolution settings: The optimal resolution depends on your desktop resolution. For desktop resolution of 1440x900, choose for example an image resolution of 1400x820.

2. Rename it to 02574.bmp and copy it into one of the set-directories (choose, for example, the one containing icons that best fit your new background).

3. If you want to use the just modified set each time you start your notes client, add the entry described in 4.2 to your notes.ini.
